CASE STUDY 1:

Lindsay M. closed a 24-month Energy contract with a Nissan dealership earning her an annual commission of \$2,500. Under typical circumstances, these funds would not have been paid for several months. This would not have helped her put a down payment on the new car lease she was about to enter in to. Lindsay was able to monetize the deal by requesting a Next Day Pay from her BOX Account Manager. After everything checked out and the supplier approved the deal she received the funds in her account the next day. Now that's fast!

CASE STUDY 2:

Richard G. closed a 12-month Energy contract with a Roller-Skating Rink in Pennsylvania. His subagent was only willing to sign the deal with him if he committed to pay the \$1,900 commission that week. Under normal circumstances Richard would not have received payment on the deal until the next commission cycle, but that was too far away. Richard requested Next Day Pay on the deal and had the money in his account the following day. Once Richard realized how powerful BOX's Next Day Pay Program is, he used it as a recruiting tool for his subagent network and was able to attract several more quality agents that now participate in the program. Now that's taking advantage of opportunity!

Broker Online Exchange (BOX) is the ultimate commercial energy partner: Providing energy brokers and affiliates with access to all top suppliers, instant pricing, cutting-edge software, all backed by world-class support.
